

Our Community

Please join us for 'Our Community, Our Health,' an ongoing conversation between health researchers, those who participated in their research, and others, to better understand the findings of a variety of health research topics and how this research contributes to our community's health.

Our Health

Wednesday, April 30th
5-7pm (Reception 4:30-5 pm)

HealthStreet

2401 SW Archer Road
(off the corner of SW 23rd Dr. and Archer Rd.)
(352) 294-4880
www.myhealthstreet.org

Presenter	Topic
Rhonda Cooper-DeHoff, PharmD, MS, FAHA, FACC Associate Professor, College of Medicine	Pharmacogenomic Evaluation of Antihypertensive Responses [PEAR-2]. The purpose of this study was to gain a better understanding about why some people with hypertension responded better or worse than others to blood pressure lowering medications.
Nicole Ledger, BS Research Assistant, College of Dentistry	The Influence of Periodontal Treatment on Gingival Inflammatory Response of the Type 2 Diabetic Patient. The purpose of this study was to evaluate the effects of gum disease treatment in type 2 diabetic patients and the use of different toothpastes on this treatment.
Stephanie Staras, PhD, MSPH Assistant Professor, College of Medicine	A Multilevel Approach to increasing HPV Vaccine Initiation among Adolescents- Part 1. The purpose of this study was to develop an intervention to improve human papillomavirus (HPV) vaccination among adolescents.
Catherine Striley, PhD, MSW, MPE Assistant Professor, College of Public Health and Health Professions	Comorbidity and Diagnosis Communication Preferences among Patients with Movement Disorders. The purpose of this study, among Movement Disorder Clinic patients with Essential Tremor, Tourette Syndrome Disorder or Dystonia, was to characterize other health problems, including mental health problems, assess treatment received and better understand physician-patient communication preferences.
